Thanks for reading Bundle 5 of Chibi Miku-san. Here, a new friend has appeared, in Chibi Miku-san #50 is where Yowane Haku first appeared in the series. Yowane is actually an "Utau" a fan made vocaloid that also uses the Vocaloid 2 engine. Yowane is originally created by Caffein. She is often depicted as a gloomy character and sometimes considered as an antagonist, she represents the badly made songs by users of Vocaloid 2. In the Chibi Miku yonkoma, Yowane Haku is a friend to both of the Hatsune sisters and is allergic to almost anything fun. Aside from that, her personality is very identical to her original character, except for her trademark alcohol abuse.

That's all for now, hope to see you guys again on the next bundle of Chibi-Miku-san!
